Providing First World Library services By using Koha, DSpace, vufind and Drupal

Presented By
Nur Ahammad
Consultant of the project- Modernization of Central Library of CVASU

First World Country Libraries

What are they using and What types of services are they providing?

For ILS-

Open-source : CDS Invenio, Evergreen, Koha, Kuali OLE, NewGenLib, PhpMyBibli OpenBiblio

Proprietary :

- Millanium
- Aleph from Ex Libris
- Innovative Interfaces
- SirsiDynix
- Talis (UK and Ireland)
- Virtua, former VTLS, from VTLS Inc.
- Voyager from former company Endeavor Information Systems, later acquired by Ex Libris

For Institutional Repository

There are a number of open-source software packages for running a repository including:

- DSpace
- Eprints
- Fedora

There are also hosted (proprietary) software services, including:

- Digital Commons, a full-service commercial platform from the Berkeley Electronic Press
- SimpleDL

For Discovery tools-

Propitory:-

- Ebsco Discovery Service
- Summon Serial Solution
- WorldCat Local (OCLC)

Open Source:-

- Vufind
- Social Online Public Access Catalog
- Blacklight OPAC

For Library Web site:

- Drupal
- WordPress
- Joomla
- Plone

Koha

Koha is a open source Library Management Software. It is extremely customizable. According to Library Technology Guide, maintained by Marshall breeding well-known library scientist, there are almost 6000 libraries presently using koha. In Bangladesh, 13 libraries are now using koha.

Some Libraries which using koha:

• Staffordshire University (http://libcat.staffs.ac.uk)
•Derby, KS Public Derby Public Library (http://derby.kohalibrary.com)
•New York University Health Sciences Libraries (http://hslcat.med.nyu.edu)
•Santa Cruz Public Libraries (10 branches and Bookmobile)
•**Bethel University.** Bethel University Library. (McKenzie, Tennessee United States) [web site] [online catalog]

In United States 983 libraries are presently using koha [Library Technology Guide

Everybody can get koha user list by surfing the following sites
http://wiki.koha-community.org/wiki/KohaUsers

DSpace (Digital Institutional Repository)

An IR is a set of services and technology that provide the means to collect, manage, provide access to, disseminate, and preserve digital materials produce at an institution. Alternatively it also serve as Digital Library. It provide many facilities to user such as-

- User can get all digital materials which uploaded to DSpace.
- Full text search facilities
- Google provide DSpace materials link frequently
- Self Archiving – faculty can submit articles
- User can get new Item submission mail.

And many more facilities Dspace provides

Near about 1378 institutions are presently using Dspace all around the world. In Bangladesh ICDDRB, Independent University, Bangladesh and BRAC University are using Dspace. Dhaka University Library also started using DSpace.

DSpace for MIT Faculty and Researchers

Welcome to DSpace@MIT, MIT's online institutional repository — built to save, share, and search MIT's digital research materials.

SAVE

- Store your work in an organized, secure, and searchable archive
- Preserve your articles, datasets, images, course materials, and more
- Let MIT Libraries manage your research for the long term — no need to manage your own web server

SHARE

- Distribute your research quickly
- Enjoy worldwide visibility, permanently

SEARCH

- Get top search results in Google
- Increase accessibility to your work
- Browse others' research

DSpace@MIT Profiles

Meet two MIT faculty who rely on DSpace@MIT to house and distribute their research:

- **Prof. Ceasar McDowell**
- **Dr. Gareth H. McKinley**

Dozens of MIT faculty, researchers, departments, labs, and centers have already joined DSpace.

See DSpace@MIT in Action

Read about DSpace in the news (at the DSpace wiki). Browse or search through MIT Communities in DSpace@MIT.

Also, see DSpace sites around the world (DSpace wiki).

We Welcome *New* MIT Communities

We are eager to add new MIT communities to DSpace. Write to **DSpace Help (at) mit.edu** to get started.

Worldwide Acclaim for DSpace

"In DSpace, ideas are forever."
The New York Times

"DSpace...
has become widely popular in academe in just a few months."
The Chronicle of Higher Education

Welcome to DSpace@MIT. MIT's institutional repository built to save, share, and search MIT's digital research materials including an increasing number of conference papers, images, peer-reviewed scholarly articles, preprints, technical reports, theses, working papers, and more. For research materials in print form, please go to Barton: MIT Libraries' catalog.

Latest News

MIT Open Access Articles

DSpace@MIT's **Open Access Articles collection** contains over 7,500 scholarly articles that MIT Faculty have made openly available on the web under their **Open Access Policy**. Articles have been viewed more than 600,000 times since the collection was launched in October 2009. [Updated October, 2012] | **More information about the policy** | **Submit a paper** | **Browse the collection**

Celebrating three years of the MIT Faculty Open Access Policy In the 3 years since the establishment of the Policy, articles in the Open Access Articles Collection have been downloaded at a rate that has grown to more than 40,000 per month, with requests from **nearly every country in the world** .

MIT Thesis Collection Tops 35,000 DSpace@MIT contains selected digital theses and dissertations from all MIT departments dating as far back as the mid-1800s. Since 2004, all new Masters and Ph.D theses have been added to the collection after degrees have been awarded. **Browse the collection**

24 million downloads in FY2011/12 Usage of DSpace@MIT continues to dramatically increase as our collections and readership grow. Analysis of usage statistics for last fiscal year indicates that DSpace@MIT content was downloaded directly by end-users 24 million times or, on average, at a rate of over 1 million downloads per month. **Contact us** to set up a collection for your research group.

All Items in DSpace@MIT are protected by original copyright, with all rights reserved, unless otherwise indicated.

IUB Institutional Repository

Welcome to IUB Digital Repository. The purpose of this repository is to collect, preserve, and distribute digital materials of IUB. Repositories are important tools for preserving an organization's legacy; they facilitate digital preservation and scholarly communication.

Dhaka University Repository

Welcome to the Dhaka University digital repository. The goal of the repository is to increase the visibility, use and impact of the university's research publications by offering them to use through the university's own archive.

The archive consists of full text materials produced in the university, such as theses, journal articles, conference publications and research materials produced by the Departments/Institutes of the Dhaka University. You can start by browsing the collection or by searching it with the search box on the right.

Vufind

Vufind is a library discovery tool which created Villanova university Library. And first implemented by National Library of Australia.

By using vufind user can search all e-journal and library materials trough one interface. User can get normal, advance and many facets search facilities by using vufind.

VuFind is a library resource portal designed and developed for libraries by libraries. The goal of VuFind is to enable your users to search and browse through all of your library's resources by replacing the traditional OPAC to include:

- Catalog Records
- Locally Cached Journals
- Digital Library Items
- Institutional Repository
- Institutional Bibliography
- Other Library Collections and Resources

VuFind is completely modular so you can implement just the basic system, or all of the components. And since it's open source, you can modify the modules to best fit your need or you can add new modules to extend your resource offerings.
